Installation Guide

Run the following command in Magento 2 root folder:

Unset

```
composer require vtnezwelt/module-geoip  
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy
```

Alternative Method:

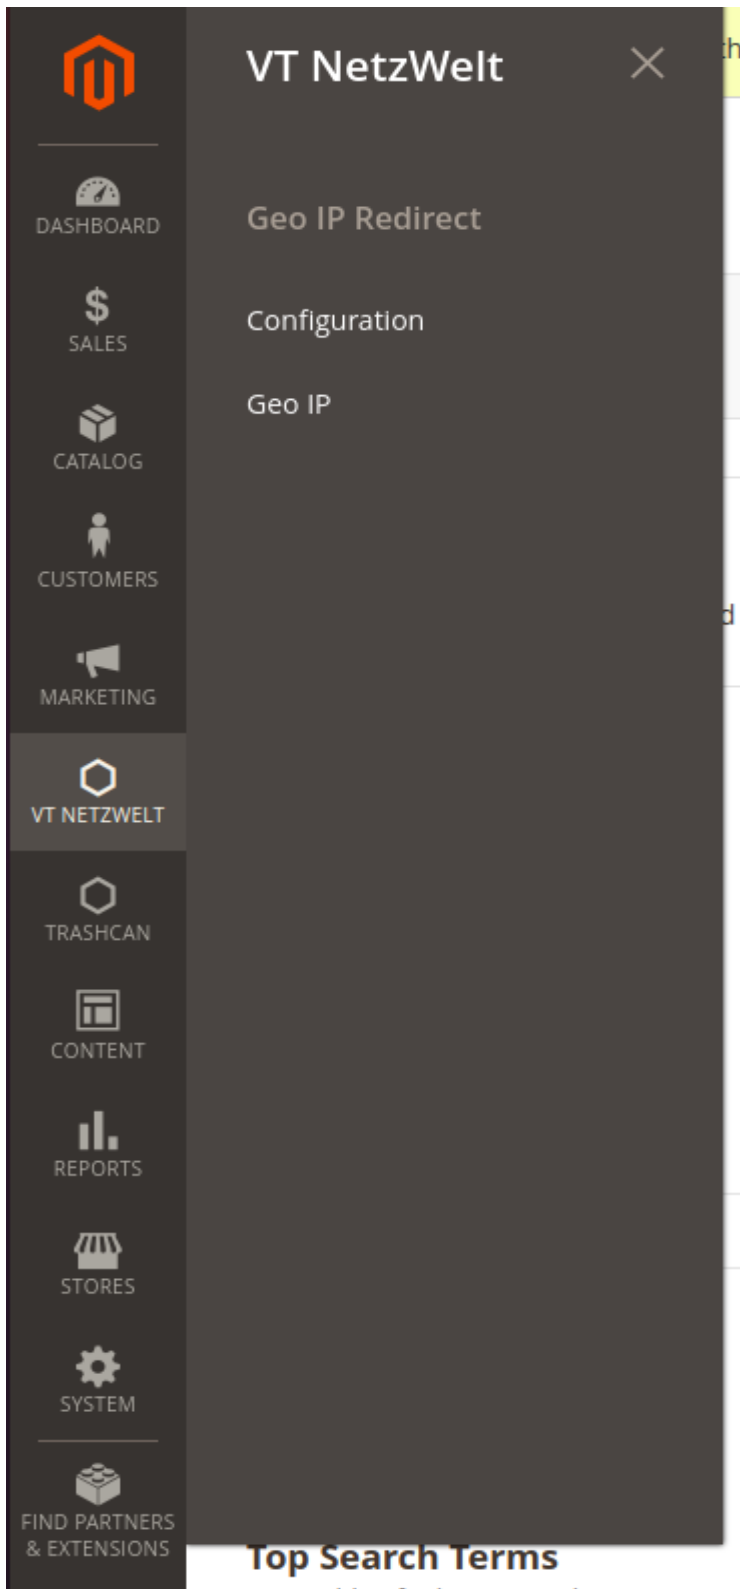

- Install the module in app/code folder

Unset

```
composer require "geoip2/geoip2"  
php bin/magento setup:upgrade  
php bin/magento setup:static-content:deploy
```

Admin Guide

Admin Menu:

Configuration Menu:

The screenshot shows the Magento 2 Configuration interface. At the top, the page is titled "Configuration" and the user is logged in as "admin". Below the title bar, there is a "Scope" dropdown set to "Default Config" and a "Save Config" button. The main content area is divided into two columns. The left column is a navigation menu with a search icon and a list of categories: VT NETZWELT EXTENSIONS (expanded), GeoIP Redirect (selected), GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, MARKETING AUTOMATION, MAGEPLAZA EXTENSIONS, VTNETZWELT EXTENSIONS, SERVICES, and ADVANCED. The right column shows the configuration options for the selected module, with "General Settings" and "Additional Settings" visible. Each setting has a toggle switch icon.

General Configuration:

- **Enable(Yes/No)** - Enable the module
